

milkadamia™

MADE IN USA FROM AUSTRALIAN MACADAMIAS

Our business is growing

...growing healthy trees that is. The family-owned farms are nestled near the eastern coast of Australia in the very region where the trees originated. In a nutshell...our abundant rainfall, ample sunshine, rich soil and low impact farming is good for our nuts.

Heart n' soil – how good food is grown now.

Milkadamia is the first non-dairy milk so close to the taste and texture of dairy that the Moo Is Moot™

TASTE & TEXTURE

The creamy, mild flavor of a macadamia makes it the perfect nut milk to trade consumers up from dairy

RAW MACADAMIAS

We don't roast our nuts to yield a subtle, clean flavor profile and to protect the healthy oils – that means we only use the highest quality macadamia kernels

FREE-RANGE TREES

Trees supporting life, not trees on life support. Watered exclusively by rainfall.

Socially Relevant

Connecting with non-dairy consumer values on a deeper level by supporting regenerative agriculture and value-driven, pro-Earth food choices

SHELF STABLE

“Milkadamia” finally a **“BRAND”** to revitalize shelf stable milks

Our Macadamias are watered exclusively by our abundant rainfall.

It takes 1.1 gallons of water to grow one almond.
